EXECUTIVE SUMMARY

ALTEC Environmental Consulting, LLC (ALTEC) was retained by Mr. Patrick Murphy of the Biomedical Research Foundation of Northwest Louisiana (the Foundation) to conduct a Phase I Environmental Site Assessment (ESA) on an approximate 3.9-acre tract (the Property) located at 2005 Greenwood Road in Shreveport, Caddo Parish, Louisiana. At the time of this Phase I ESA, the Property was undeveloped; however, the foundations of previous commercial buildings were still evident at the Property.

This Phase I ESA was performed in accordance with guidelines set forth in the American Society of Testing and Materials (ASTM) *International Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (Designation: Practice E1527-05)*. The intent of this Phase I ESA was to identify any obvious adverse environmental conditions, suspicious activities, or hazardous waste storage/disposal sites on or near the Property and identify any concerns on the Property that may be considered *recognized environmental conditions (RECs)*, as defined in ASTM Standard E1527-05.

Using standard historical sources that were reasonably ascertainable, ALTEC identified one *Historical REC* in connection with the Property. Specifically, the Sanborn Fire Insurance Map dated 1935 depicted a gasoline service station at the northeast corner of the Property. ALTEC did not identify any other *RECs* in connection with the Property through site reconnaissance, including visual observation of the Property. An ASTM regulatory database review and site visit revealed no other *RECs* on the Property or environmental concerns on adjoining properties that could pose an environmental threat to the Property. ALTEC did not identify any geologic, hydrogeologic, hydrologic, and/or topographic conditions of the Property that would indicate potential adverse environmental conditions.

ALTEC has performed a Phase I ESA of the Property in conformance with the scope and limitations of ASTM Practice E1527-05. Any exceptions to, or deletions from, this practice are described in this report. This assessment identified evidence of one *Historical REC* in connection with the Property, a former gasoline station. It is ALTEC's opinion that a Limited Phase II investigation of the Property should be performed to determine whether any soil or groundwater impacts are associated with the former presence of the gasoline station.

1.0 INTRODUCTION

ALTEC Environmental Consulting, LLC (ALTEC) was retained by Mr. Patrick Murphy of the Biomedical Research Foundation of Northwest Louisiana (the Foundation) to conduct a Phase I Environmental Site Assessment (ESA) on an approximate 3.9-acre tract (the Property) located at 2005 Greenwood Road in Shreveport, Caddo Parish, Louisiana. At the time of this Phase I ESA, the Property was undeveloped; however, the foundations of previous commercial buildings were still evident in the northern portion of the Property.

1.1 Purpose

The purpose of a Phase I ESA is to identify, to the extent feasible, pursuant to the processes prescribed herein, *recognized environmental conditions (RECs)* in connection with the Property in accordance with American Society of Testing and Materials (ASTM) Standard Practice E1527-05 and the Environmental Protection Agency's (EPA's) "All Appropriate Inquiries" (AAI) Rule (40 CFR 312). The term *recognized environmental condition* means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the Property. The purpose of an AAI Rule investigation is to identify "conditions indicative of releases or threatened releases of hazardous substances, as defined in Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) section 101 (22)."

This Phase I ESA is intended to reflect a commercially prudent and reasonable inquiry in order to satisfy one of the requirements to qualify for the *innocent landowner defense* under the CERCLA. This Phase I ESA will also encompass two additional landowner liability protections under the 2002 Brownfields Law: (1) the bona fide prospective purchaser, and (2) the contiguous property owner protections.

1.2 Detailed Scope-of-Services

A comprehensive property inspection was conducted and pertinent observations relating to the condition of the environment at the Property were recorded. This report was prepared to summarize findings and observations related to the environmental condition of the Property. Included within the contents of this report is a description of the Property, a summary of reviewable records, interviews conducted, and an opinion by ALTEC with regard to any *RECs* and concerns observed during the time of the site inspection.

1.3 Significant Assumptions

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by the Foundation. Note, however, that virtually no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground.

ALTEC assumes that information provided by persons interviewed, Environmental Data Resources, Inc. (EDR), U.S. Environmental Protection Agency (EPA), Louisiana Department of Natural Resources (LA DNR), and the Louisiana Department of Environmental Quality (LDEQ) regarding regulatory status of facilities referenced in this report is complete, accurate, and current.

1.4 Limitations and Exceptions

No limitations or exceptions were associated with this Phase I ESA.

1.5 Special Terms and Conditions

The findings and conclusions of this report are not scientific certainties, but rather, probabilities based on professional judgment concerning the significance of the data gathered during the course of this assessment. ALTEC was not able to verify that the Property or adjoining land contains no hazardous substances, petroleum products, or other latent condition beyond that detected or observed during the assessment. The possibility always exists for contaminants to migrate through surface water, air, soil, or groundwater. The ability to address accurately the environmental risks associated with transport in these media was beyond the scope of this assessment. The opinions expressed by ALTEC with reference to the Property only pertain to the conditions that existed at the Property during the time in which the site inspection was conducted.

1.6 User Reliance

This report and other instruments of service were prepared and made available for the sole use of the Foundation, and the contents thereof may not be used or relied upon by any other person or entity without the express written consent and authorization of ALTEC.

2.0 PROPERTY AND VICINITY INFORMATION

2.1 Location and Legal Description

The Property encompasses an area of approximately 3.9 acres, and is located in Section 2, Township 17 North, Range 14 West, Caddo Parish, Louisiana. The approximate center of the Property is located at Latitude 32° 29' 06.37" N and Longitude 93° 46' 15.90" W. A Site Map of the Property is located in **Appendix A** of this report.

The Property consists of an irregular-shaped parcel comprised of two separate tracts. The northernmost tract (designated herein as Tract A) comprises approximately 3.0 acres, and was formerly developed as commercial property. The southernmost tract (designated herein as Tract B) comprises approximately 0.9 acres, and consists of a portion of a former railroad right-of-way.

The legal description for the two tracts that comprise the Property is as follows:

Tract A

A certain tract of land containing 3.005 acres, more or less, located in Sections 2 and 11, Township 17 North, Range 14 West, Shreveport, Caddo Parish, Louisiana and being more particularly described as follows:

Commencing at the original intersection of the Southerly right-of-way of Greenwood Road and the Westerly right-of-way of Mansfield Road and proceed along said westerly right-of-way South $13^{\circ} 41' 53''$ West a distance of 23.60 feet to the POINT OF BEGINNING, thence continue along said westerly right-of-way South $13^{\circ} 41' 53''$ West a distance of 518.62 feet to the northerly right-of-way of the Former Yazoo and Mississippi Valley Railroad (Illinois Central System); thence leaving said westerly right-of-way proceed South $47^{\circ} 04' 29''$ West along said former northerly right-of-way a distance of 299.81 feet; thence leaving said former northerly right-of-way proceed North $06^{\circ} 54' 16''$ East a distance of 67 1.06 feet to the southerly right-of-way of Greenwood Road; thence proceed North $76^{\circ} 22' 28''$ East along said southerly right-of-way a distance of 251.40 feet; thence proceed South $44^{\circ} 57' 49''$ East a distance of 24.55 feet to the POINT OF BEGINNING.

Tract B

A certain tract of land containing 0.903 acres, more or less, located in Section 11, Township 17 North, Range 14 West, Shreveport, Caddo Parish, Louisiana and being more particularly described as follows:

Commencing at the original intersection of the Southerly right-of-way of Greenwood Road and the Westerly right-of-way of Mansfield Road and proceed along said westerly right-of-way South $13^{\circ} 41' 53''$ West a distance of 542.22 feet to the POINT OF BEGINNING, thence continue along said westerly right-of-way South $13^{\circ} 41' 53''$ West a distance of 136.00 feet to the center line of the Former Yazoo and Mississippi Valley Railroad (Illinois Central System); thence leaving said westerly right-of-way proceed South $47^{\circ} 03' 10''$ West along said center line a distance of 468.60 feet; thence leaving said center line proceed North $42^{\circ} 33' 48''$ West a distance of 75.00 feet to the northerly right-of-way of the Former Yazoo and Mississippi Valley Railroad (Illinois Central System); thence proceed North $47^{\circ} 04' 29''$ East a distance of 581.70 feet to the POINT OF BEGINNING.

2.2 Site and Vicinity General Characteristics

At the time of this Phase I ESA, Tract A was undeveloped; however, the foundations of former commercial buildings are still evident. Tract B was undeveloped and covered with grass.

The surrounding vicinity consists largely of active and vacant commercial properties. A Site Map that depicts the Property is provided in **Appendix A**, and an Area Street Map is provided as **Appendix B**. Photographs taken during the site visit are provided in **Appendix C**.

2.3 Current Use of the Property

At the time of this Phase I ESA, the Property was undeveloped commercial land and consisted of mostly paved surfaces. The Property has not been developed since the former commercial buildings at Tract A on the Property were demolished in approximately 1980.

2.4 Descriptions of Structures, Roads, and Other Improvements

No structures or other improvements currently exist at the Property, with the exception of the concrete foundations of former commercial buildings. The Property is bounded to the east by Mansfield Road and to the north by Greenwood Road.

2.5 Current Uses of Adjoining Properties

At the time of this Phase I ESA, adjoining land use consisted of:

- North – Greenwood Road and commercial properties on the north side of Greenwood Road, including Federal Express, Sahara Fast Foods (closed), and a former used car lot;
- East – Mansfield Road and commercial properties on the east side of Mansfield Road, including Ed's Muffler, an active and an inactive warehouse, and Custom Plastics office building;
- South and southeast – former railroad right-of-way and undeveloped lot;
- West – City of Shreveport Public Works Department; and
- Northwest – El Chico restaurant.

An extensive record search of federal and state environmental databases was conducted for the Property and the adjoining properties within the ASTM search radii surrounding area, including a radius search. The results of the radius search are discussed in more detail in Section 3.0 of this report. The Radius Map Report is included in **Appendix D** of this report.

2.6 Utilities

Utilities provided to the Property and in the vicinity of the Property include:

- CenterPoint Energy - natural gas service
- BellSouth - telephone service
- City of Shreveport - water and sewage service
- AEP/SWEPCO - electric service

3.0 USER PROVIDED INFORMATION

3.1 Title Records

The Foundation provided a 40-year title records search conducted by Judy S. Legendre Title & Abstract, L.L.C., which is included as **Appendix E**. The records of the Caddo Parish County Clerk identify the current owner of the subject property to be Chesapeake Louisiana, LP

(Chesapeake), with PXP Louisiana, LLC (PXP) owning a 20 per cent share. Ownership of the Property was transferred to Chesapeake and PXP by Louisiana Properties, LLC (Louisiana Properties) in April 2009. Louisiana Properties purchased the Property from Gloriland Corporation in September 2008. Ownership of the Property transferred to Gloriland Corporation from Mr. Monty Mario Glorioso and Ms. Sarah Maggio Glorioso in May 1979. Mr. and Ms. Glorioso purchased the subject property in October of 1963 from Mr. Charles Maggio.

A chain-of-title search over a longer time period was performed as part of due diligence activities for the 2008 property sale. Additional chain-of-title information from the June 2008 *Phase I Environmental Site Assessment Report* prepared by SRP Environmental is referenced as follows:

Mr. Maggio purchased the subject property from International Harvester Company in December 1958. International Harvester Company purchased the subject property from Ms. Harriet D. Van Leer in September of 1939. Ms. Van Leer acquired the subject property from the succession of Mr. Charles Draper in 1924. Mr. Charles Draper purchased the subject property from Mr. William Hamilton in 1907. Mr. William Hamilton is the earliest owner of record.

3.2 Environmental Lien or Activity and Use Limitations

Based on the 40-year chain-of-title information, no environmental liens or activity and use limitations were associated with the Property.

3.3 Specialized Information

The User possessed no specialized information regarding the Property.

3.4 Commonly Known or Reasonably Ascertainable Information

The User was aware that the Property was formerly used for commercial purposes.

3.5 Owner Information

The current owner of the subject property is Chesapeake Louisiana, LP (Chesapeake), with PXP Louisiana, LLC (PXP) owning a 20 per cent share. ALTEC conducted a telephone interview with Mr. Kevin McCotter of Chesapeake on August 31, 2012. Mr. McCotter indicated that Chesapeake had originally purchased the Property in 2009 to develop as a natural gas production well; however, these plans were not carried out, and the Property has not been developed in any way by Chesapeake.

3.6 Other

The User provided ALTEC with a *Phase I Environmental Site Assessment Report*, prepared by SRP Environmental, and dated June 2008. Several items from the June 2008 report are referenced in this Phase I ESA report, such as the additional title information in Section 3.1.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

The purpose of the regulatory record review is to obtain and review reasonably ascertainable records that help identify *RECs* in connection with the Property. For this review, ALTEC relied on records obtained from an environmental database search firm, Environmental Data Resources (EDR). The radius search distances chosen were selected using ASTM International guidelines. These search distances may have been expanded to ensure the distances would include sites as measured from the Property boundaries. The Radius Map Report includes a listing of all the databases searched and the sites that were identified on the Property, on adjoining properties, or on other properties within the search radii.

The Property was not listed in any of databases searched. Only the sites listed in the Radius Map Report are discussed in the following section. Due to incomplete addresses, unregistered sites, etc., additional sites may exist. The Radius Map Report is included in **Appendix D**.

4.1.1 CERCLIS

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL. A review of the CERCLIS list, as provided by EDR, and dated December 27, 2011 has revealed that there is one CERCLIS site within approximately one half-mile of the Property.

- American United Van Lines at Texas Avenue & Levy Street – approximately one half mile to the northeast of the Property

Due to the distance of this site from the Property, ALTEC does not consider it to be an environmental concern in connection with the Property.

4.1.2 RCRA

The EPA's RCRA Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA facilities database is a compilation by the EPA of facilities that report generation, storage, transportation, treatment, or disposal of hazardous waste. RCRA Large Quantity Generators (LQG) are facilities that generate at least 1,000 kg/month of non-acutely hazardous waste (or 1 kg/month of acutely hazardous waste). RCRA Small Quantity Generators (SQG) are facilities that generate less than 1,000 kg/month of non-acutely hazardous waste. RCRA Conditionally Exempt Small Quantity Generators (CESQG) produce less than 100 kg of hazardous waste each month. RCRA NonGenerators (NonGen) do not presently generate hazardous waste, but were former hazardous waste generators. No RCRA LQG facilities were listed within a 0.375-mile radius of the Property.

A review of the RCRA-SQG list, as provided by EDR, and dated March 15, 2012 has revealed that there are six RCRA-SQG sites within approximately one quarter-mile of the Property.

- Shreveport City Water & Sewer at 2139 Greenwood Road – adjoins the Property to the west and north of Tract B
- United Parcel Service at 1907 Jim Casey Drive – one eighth to one quarter mile to south-southeast of the Property
- Former Sproull Property at 3104 Mansfield Road - one eighth to one quarter mile to south of the Property
- Sanders Paint & Body at 3131 Mansfield Road - one eighth to one quarter mile to south of the Property
- Red River Pharmaceutical Development at 2031 Kings Highway - one eighth to one quarter mile to south of the Property
- Red River Pharmaceutical LLC at 2001 Kings Highway - one eighth to one quarter mile to south of the Property

A review of the RCRA-CESQG list, as provided by EDR, and dated March 15, 2012 has revealed that there are four RCRA-CESQG sites within approximately one quarter-mile of the Property.

- Federal Express at 2122 Greenwood Road – across Greenwood Road to north of the Property
- Randy Nixon at 2491 Texas Avenue – less than one eighth mile to north-northeast of the Property
- Sherwin Williams Co. at 2455 Texas Avenue – less than one eighth mile to northeast of the Property
- United States Postal Service at 2400 Texas Avenue - one eighth to one quarter mile to northeast of the Property

A review of the RCRA-NonGen list, as provided by EDR, and dated March 15, 2012 has revealed that there are two RCRA-NonGen sites within approximately one quarter-mile of the Property.

- American Body Shop at 3133 Mansfield Road - one eighth to one quarter mile to south of the Property
- Air Liquide Corp. at 2134 Kings Highway - one eighth to one quarter mile to south-southwest of the Property

Due to the distance of these sites from the Property and/or a lack of violations on record, ALTEC does not consider any of the listed RCRA-SQG, RCRA-CESQG, and RCRA-NonGen sites to be an environmental concern in connection with the Property.

4.1.3 SWF/LF

The Solid Waste Facilities/Landfill Sites (SWF/LF) records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the

Department of Environmental Quality's Louisiana's Solid Waste Facilities list. A review of the SWF/LF list, as provided by EDR, and dated June 28, 2012 has revealed that there is one SWF/LF site within approximately one half-mile of the Property.

- Aegis Bio Systems LLC at 2105 Stonewall Street - one quarter to one half mile to north-northwest of the Property

Due to the distance of this site from the Property, ALTEC does not consider it to be an environmental concern in connection with the Property.

4.1.4 UST

The Underground Storage Tank (UST) database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Quality's Louisiana Underground Storage Tank Database.

The Property is not listed as a UST site. A review of the UST list, as provided by EDR, and dated April 2, 2012 has revealed that there are 12 UST sites located within approximately a quarter-mile of the Property.

- Federal Express at 2122 Greenwood Road – across Greenwood Road to north of the Property
- Shreveport City Water & Sewer at 2139 Greenwood Road – adjoins the Property to the west and north of Tract B
- Otto's Greenwood Road at 2138 Greenwood Road – less than one eighth mile to northwest of the Property
- United Parcel Service at 1907 Jim Casey Drive – one eighth to one quarter mile to south-southeast of the Property
- Wilson Foods Corp. at 3415 Carrie Avenus - one eighth to one quarter mile to west-northwest of the Property
- C Gulley Truck Service at 2320 Texas Avenue - one eighth to one quarter mile to northeast of the Property
- Gulf Service Station at 2021 Kings Highway - one eighth to one quarter mile to south of the Property
- Air Liquide Corp. at 2134 Kings Highway - one eighth to one quarter mile to south-southwest of the Property
- Mauldin Lift Truck Sales at 2491 Texas Avenue - less than one eighth mile to north-northeast of the Property
- Phillips Energy Co. at 2925 Mansfield Road - less than one eighth mile to south of the Property
- United States Postal Service at 2400 Texas Avenue - one eighth to one quarter mile to northeast of the Property
- Murphy Bonded Warehouse at 2405 Bell Street - one eighth to one quarter mile to east of the Property

Due to the distance of these sites from the Property and/or a lack of violations on record, ALTEC does not consider any of the listed UST sites to be an environmental concern in connection with the Property.

4.1.5 LUST and HIST LUST

The Leaking Underground Storage Tank Incident Reports (LUST) and Underground Storage Tank Case History Incidents (HIST LUST) database contain an inventory of reported leaking underground storage tank incidents. The data come from the LDEQ's Leaking UST Database. A review of the LUST list, as provided by EDR, and dated April 2, 2012 has revealed that there is one LUST site within approximately 0.5 miles of the target property.

- Sklar & Phillips Oil Company at 2925 Mansfield Road – less than one eighth mile to south of the Property

A review of the HIST LUST list, as provided by EDR, and dated November 1, 1999 has revealed that there are six HIST LUST sites within approximately one half mile of the target property.

- Shreveport City Water & Sewer at 2139 Greenwood Road – adjoins the Property to the west and north of Tract B
- Gulf Service Station at 2021 Kings Highway - one eighth to one quarter mile to south of the Property
- Shred-It USA Willis Knighton North at 2600 Greenwood Road - one quarter to one half mile to west-southwest of the Property
- C Gulley Truck Service at 2004 Claiborne - one quarter to one half mile to south of the Property
- Sklar & Phillips Oil Company at 2925 Mansfield Road – less than one eighth mile to south of the Property
- Saunders Systems, Inc. at 1860 Kings Highway - one quarter to one half mile to south-southeast of the Property

Due to the distance of these sites (with the exception of the adjoining City of Shreveport property at 2139 Greenwood Road) from the Property, ALTEC does not consider any of the listed LUST sites to be an environmental concern in connection with the Property.

With regard to the adjoining City of Shreveport property at 2139 Greenwood Road, the database comments indicate an inventory discrepancy of 700 gallons on April 30, 1993. The 10,000-gallon gasoline UST was taken out of service and then tested, which it failed. Excavation adjacent to the UST failed to locate any product, and no further corrective action was reported. ALTEC does not consider this LUST site to be an environmental concern in connection with the Property, as the site was issued "No Further Action at This Time" status by the LDEQ.

4.1.6 VCP

This database lists sites that have entered the LDEQ's Voluntary Remediation Program (VCP). A review of the VCP list, as provided by EDR, and dated April 12, 2012 has revealed that there are three VCP sites within approximately one half-mile of the Property.

- Former Modern Iron Works at 3002 Mansfield Road – one eighth to one quarter mile to south of the Property
- Wilson Foods Corp. at 3415 Carrie Avenue - one eighth to one quarter mile to west-northwest of the Property
- Wilson Foods Corp. at 2400 Kings Highway - one quarter to one half mile to southwest of the Property

Due to the distance of these sites from the Property, ALTEC does not consider any of the listed VCP sites to be an environmental concern in connection with the Property.

4.2 Additional Environmental Record Sources

4.2.1 Local Brownfield Lists

The EPA maintains a database of Brownfields properties (US BROWNFIELDS) from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. A review of the US BROWNFIELDS list, as provided by EDR, and dated June 27, 2011 has revealed that there are eight US BROWNFIELDS sites within approximately one half-mile of the target property.

- 2139 Greenwood Road – adjoins the Property to the west and north of Tract B
- Modern Iron Works at 3002 Mansfield Road – one eighth to one quarter mile to south of the Property
- Moore's Tire and Auto at Mansfield Road – one eighth to one quarter mile to south of the Property
- Former Sproull Property at 3104 Mansfield Road - one eighth to one quarter mile to south of the Property
- Wilson Foods Corp. at 2400 Kings Highway - one quarter to one half mile to southwest of the Property
- ACME Brick Site - 1919 Kings Highway - one quarter to one half mile to south-southeast of the Property
- Parish Unit at 1866 Kings Highway - one quarter to one half mile to south-southeast of the Property
- 1701 Kings Highway - one quarter to one half mile to southeast of the Property

Due to the distance of these sites (with the exception of the adjoining City of Shreveport property at 2139 Greenwood Road) from the Property, ALTEC does not consider any of the listed US BROWNFIELDS sites to be an environmental concern in connection with the Property. With regard to the adjoining City of Shreveport property at 2139 Greenwood Road, there is no indication that this US BROWNFIELD site represents an environmental concern in connection with the Property.

4.2.2 Local Lists of Landfill / Solid Waste Disposal Sites

A review of the LDEQ's Recycling Directory (SWRCY), as provided by EDR, and dated September 14, 2010 has revealed that there is one SWRCY site within approximately one half-mile of the Property.

- Coburn Supply at 2005 Claiborne Avenue - one quarter to one half mile to south of the Property

Due to the distance of this site from the Property, ALTEC does not consider it to be an environmental concern in connection with the Property.

4.2.3 Oil and Gas Wells

Louisiana has a long history of oil and natural gas production. This history, poor recordkeeping, and the large number of wells drilled presents the opportunity for unrecorded wells to be found on sites during construction activities.

ALTEC conducted a search of the LA DNR's electronic database to determine if any oil or gas wells were located on or near the Property. The search did not identify any oil or gas wells on the Property.

4.2.4 Water Wells

ALTEC conducted a search of the LA DNR's SONRIS online system to determine if any water wells were registered on or near the Property. The search did not identify any water wells on the Property. During the site visit, ALTEC did not identify any water wells on the Property.

4.3 Physical Setting Sources

4.3.1 Geology

The surface of Louisiana is underlain by geologically young sedimentary sequences that were deposited in or adjacent to rivers and deltas in a coastal plain setting. These deposits, and those in other states flanking the Mississippi Valley, indicate that a major river system corresponding to the Mississippi River has persisted and been a major topographic feature, at least since the Gulf of Mexico basin began to form by the separation of North America from South America. Holocene alluvium of the Mississippi, Red, Ouachita, and other rivers and smaller tributaries, together with coastal marsh deposits, occupy about 55 percent of the surface of the state. Most of the remaining state's surface (about 20 percent) comprises strata of Tertiary Age, principally on the Sabine Uplift (which lies in the northwest portion of the state), and in the north Louisiana salt-dome basin.

The surface and near surface areas of Caddo Parish in the vicinity of the Property are covered by sedimentary deposits. According to the *Geologic Map of Louisiana* (1984) prepared by the Louisiana Geological Survey, the Property is on or near the contact between Quaternary age alluvial deposits and the Paleocene age Wilcox Group. The Quaternary alluvial sediments

consist of reddish brown clay and silty clay in the Red River valley, with some localized sand and gravel deposits. The Wilcox Group is described as gray to brown lignitic sands and silty to sandy lignitic clays, with seams of lignite and some limestone and glauconite.

4.3.2 Soil

According to the United States Department of Agriculture Natural Resources Conservation Service (NRCS), Soil Survey of Caddo Parish, Louisiana, the soil unit mapped for the Property is Urban land. Urban land consists of areas where 85 percent of the surface is covered by asphalt, concrete, buildings, or other impervious surfaces. The USDA Web Soil Survey Map of Property is included in **Appendix F**.

4.3.3 Hydrology

Surface drainage at the Property is generally to the east and south. Although specific groundwater flow data was not available as part of the Phase I ESA work scope, localized groundwater flow in the shallow, unconfined aquifer is assumed to follow the surface topography, primarily toward the east and south.

The primary groundwater resources of Caddo Parish, from near surface to deepest, include the Red River alluvial aquifer, the upland terrace aquifer, and the Carrizo-Wilcox aquifer. The Sparta aquifer and aquifers within the Cane River formation also yield freshwater in the northernmost parts of the parish, but are not considered to be major resources because of their limited extents in the parish. Fresh groundwater (water with a chloride concentration of 250 milligrams per liter [mg/L] or less) is available throughout most of the parish at depths ranging from about 100 feet above the National Vertical Datum of 1929 (NGVD) (sea level) near the western parish line to about 400 feet below NGVD near the northern parish line. Fresh groundwater is not available in an area east of Caddo Lake.

Groundwater recharge and flow in Caddo Parish are affected by the Sabine uplift (an asymmetric structural dome) and faulting. Recharge to aquifers is from precipitation, leakage from adjacent aquifers, and seasonal input from streams. Discharge from the aquifers is by natural flow into streams, leakage into adjacent aquifers, and withdrawals from wells.

State well-registration records listed 3,741 active water wells in Caddo Parish in 2009, including 3,198 domestic, 233 public-supply, 213 irrigation, 96 industrial, and 1 power generation wells. In 2005, groundwater withdrawals for various uses included public supply, industry, rural domestic, livestock, general irrigation, and aquaculture.

4.3.4 Topography

Existing topography at the Property is relatively flat, with slight slopes toward the east and south. The elevation of the west Property boundary is approximately 230 feet above NGVD, and the east and southern Property boundaries are approximately 220 – 225 feet above NGVD.

4.3.5 FIRM Information

The Property is located on the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) for Caddo Parish, Louisiana, Community Panel Number 22017C0486F, with an effective date of April 6, 2000. The Property and adjoining parcels are designated as Zone X, determined to be outside the 500-year floodplain. A copy of the FIRM is included in **Appendix G** of this report.

4.4 Historical Use Information on the Property and Adjoining Properties

4.4.1 Land Usage

Based on interviews and reviews of historical aerial photographs and historical topographic maps, the Property was developed commercially from at least 1943 to 1980, when the commercial structures on site were demolished.

4.4.2 Topographic Maps

ALTEC reviewed historical topographic maps dated 1945, 1959, 1960, 1969, and 1980 that depicted the Property. Pertinent observations are summarized below:

- 1945, 1959, 1960, and 1969 – No structures are depicted on the Property or adjoining properties. Greenwood Road, Mansfield Road and the former railroad that forms the southern boundary of the current Property are depicted.
- 1980 - Structures are depicted on the Property and adjoining properties. The former railroad that forms the southern boundary of the current Property is not depicted.

The review of the historical topographic maps did not reveal any *RECs* in connection with the Property. Copies of the historical topographic maps are included in **Appendix H** of this report.

4.4.3 Aerial Photographs

ALTEC reviewed aerial photographs of the Property dated 1939, 1949, 1959, 1966, 1979, 1989, 1998, 2002, and 2010. Pertinent observations are summarized below:

- 1939 – The Property and adjoining properties to the west are undeveloped. Commercial development is apparent to north and east of the Property. Greenwood Road, Mansfield Road, and the former railroad that forms the southern boundary of the current Property are apparent.
- 1949 – Resolution of the aerial photograph is too poor to observe details.
- 1959 – Tract A of the Property and adjoining properties to the west are developed as commercial properties.

- 1966 – There are no distinct changes from the 1959 aerial photograph.
- 1979 - There are no distinct changes from the 1959 and 1966 aerial photographs.
- 1989 - Resolution of the aerial photograph is too poor to observe details.
- 1998 – No development is noted at the Property. Paved areas and foundations of former commercial buildings at the Property are apparent.
- 2002 – No development is noted at the Property. Paved areas and foundations of former commercial buildings at the Property are apparent.
- 2010– There are no distinct changes from the 2002 aerial photograph.

The review of the historical aerial photographs revealed no *RECs* in connection with the Property. Copies of the historical aerial photographs are included in **Appendix I** of this report.

4.4.4 Sanborn Fire Insurance Maps

ALTEC reviewed historical Sanborn Maps of the Property area obtained from EDR and dated 1935, 1961, and 1964. The 1961 and 1964 Sanborn Maps depict the known former commercial development of the Property; however, the 1935 Sanborn Map depicts a service station on the Property in proximity to the intersection of Mansfield Road and Greenwood Road. The presence of a former gasoline station is considered to be a *Historic REC*. The historical Sanborn Maps are presented in **Appendix J**.

4.4.5 City Directories

ALTEC reviewed city directory information provided by EDR from the years 1963 to 2012. City directories provide a listing of residents or businesses present at a specific address each year. The listings included in the city directories are typically limited to areas within corporate boundaries. The subject property is located at 2005 Greenwood Road, which is located within the corporate limits of Shreveport, Louisiana. Previous occupants include Mischer Wholesale Air Conditioning (1975-1980), Federal Building Annex (1965-1975), and Winterton Food Stores Inc. (1960-1965). Information provided in the 2008 Phase I ESA report by SRP Environmental also indicate that International Harvester Co. occupied the Property from 1943-1960.

The city directory information did not reveal any businesses or operations that would represent an environmental concern. A copy of the City Directory Abstract is included in **Appendix K**.

5.0 INTERVIEWS

On August 31, 2012, Christopher Johnson of ALTEC conducted telephone interviews with former Property owners, Mr. Joseph Glorioso and Mr. Kevin McCotter. Neither Mr. Glorioso nor Mr. McCotter was aware of any environmental concerns associated with the Property. It should be noted that Mr. Glorioso was previously interviewed for the 2008 Phase I ESA conducted by SRP Environmental, and at that time Mr. Glorioso indicated

knowledge of former underground storage tanks at the Property. During the interview conducted by ALTEC on August 31, 2012, Mr. Glorioso was specifically asked about this issue, to which he replied that he didn't remember.

6.0 SITE RECONNAISSANCE

6.1 General Property Description

The Property consists of two contiguous tracts. Tract A is approximately 3.0 acres in size and consists of mostly paved areas and concrete foundations from former commercial structures. It should be noted that portions of the concrete foundation that are raised above grade (at what appears to be former loading dock) appear to be structurally unsound and show signs of collapse. Tract B is approximately 0.9 acres in size and consists of a grass-covered former railroad right-of-way. Photographs taken during the site inspections are included in **Appendix C**.

Hazardous Substances and Petroleum Products

No hazardous substances and petroleum products were noted at the Property.

Aboveground or Underground Storage Tanks

No aboveground or underground storage tanks were noted at the Property.

Odors

No unusual odors were detected at the Property.

Standing Water

One area of standing water was noted on Tract A, likely resulting from poor drainage of storm water.

Drums and Other Containers

No drums and other containers were observed during the inspection of the Property.

PCB-containing materials

Pole-mounted electrical transformers were observed adjacent to the boundaries of the Property. As specified in 40 CFR Part 761.2 (a) (2), such transformers may be assumed to be mineral oil filled, and unless otherwise labeled, containing polychlorinated biphenyls (PCBs). The transformers observed at the Property boundaries appeared to be intact, with no signs of leakage. ALTEC does not consider the transformers to be an environmental concern, and no other potential PCB-containing materials were observed at the Property.

Other Potential Issues

Although testing for asbestos containing material (ACM) was not part of the Phase I ESA work scope, it should be noted that suspect ACM was noted in the form of floor tile and mastic remnants.

7.0 CONCLUSIONS

ALTEC Environmental Consulting, LLC (ALTEC) has performed a Phase I ESA in general conformance with the scope and limitations of ASTM Practice E1527-05 on an approximate 3.9-acre tract located at 2005 Greenwood Road in Shreveport, Louisiana. Any exceptions to, or deletions from, this practice are described in this report. The intent of this Phase I ESA was to identify any obvious adverse environmental conditions, suspect activities, or hazardous waste storage/disposal sites on or near the Property and identifies any concerns on the Property that may be considered *RECs*, as defined in *ASTM Standard E1527-05*.

This Phase I ESA revealed one *REC* in connection with the Property. Specifically, the Sanborn Map dated 1935 depicts a gasoline station in the northeast corner of the Property.

An ASTM regulatory database review and the site visit revealed no other *RECs* on the Property or environmental concerns on adjoining properties that could pose an environmental threat to the Property. ALTEC identified no geologic, hydrogeologic, hydrologic, and/or topographic conditions of the Property that would indicate potential adverse environmental conditions.

7.1 Environmental Professional Statement

This Phase I ESA was prepared by Environmental Professionals as defined in Section 3.2.29 of the *ASTM International Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment Process (Designation: Practice E1527-05)*. References for the sources consulted in preparation of this report are located in **Appendix L**. Definitions used in this report are included in **Appendix M**.

We declare that to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR Part 312. We have the specific qualifications based on education, training, and experience to assess a property of this nature, history, and setting. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. The qualifications of the Environmental Professionals are included in **Appendix N** of this report.

8.0 DISCLAIMER

This environmental site assessment was performed in accordance with generally accepted practices of the profession observing the same degree of care and skill generally exercised by the profession under similar circumstances and conditions. The opinions expressed in this report, together with the observations and findings, are based on professional judgment of the data gathered and developed during the course of this investigation. It is not the intent or purpose of

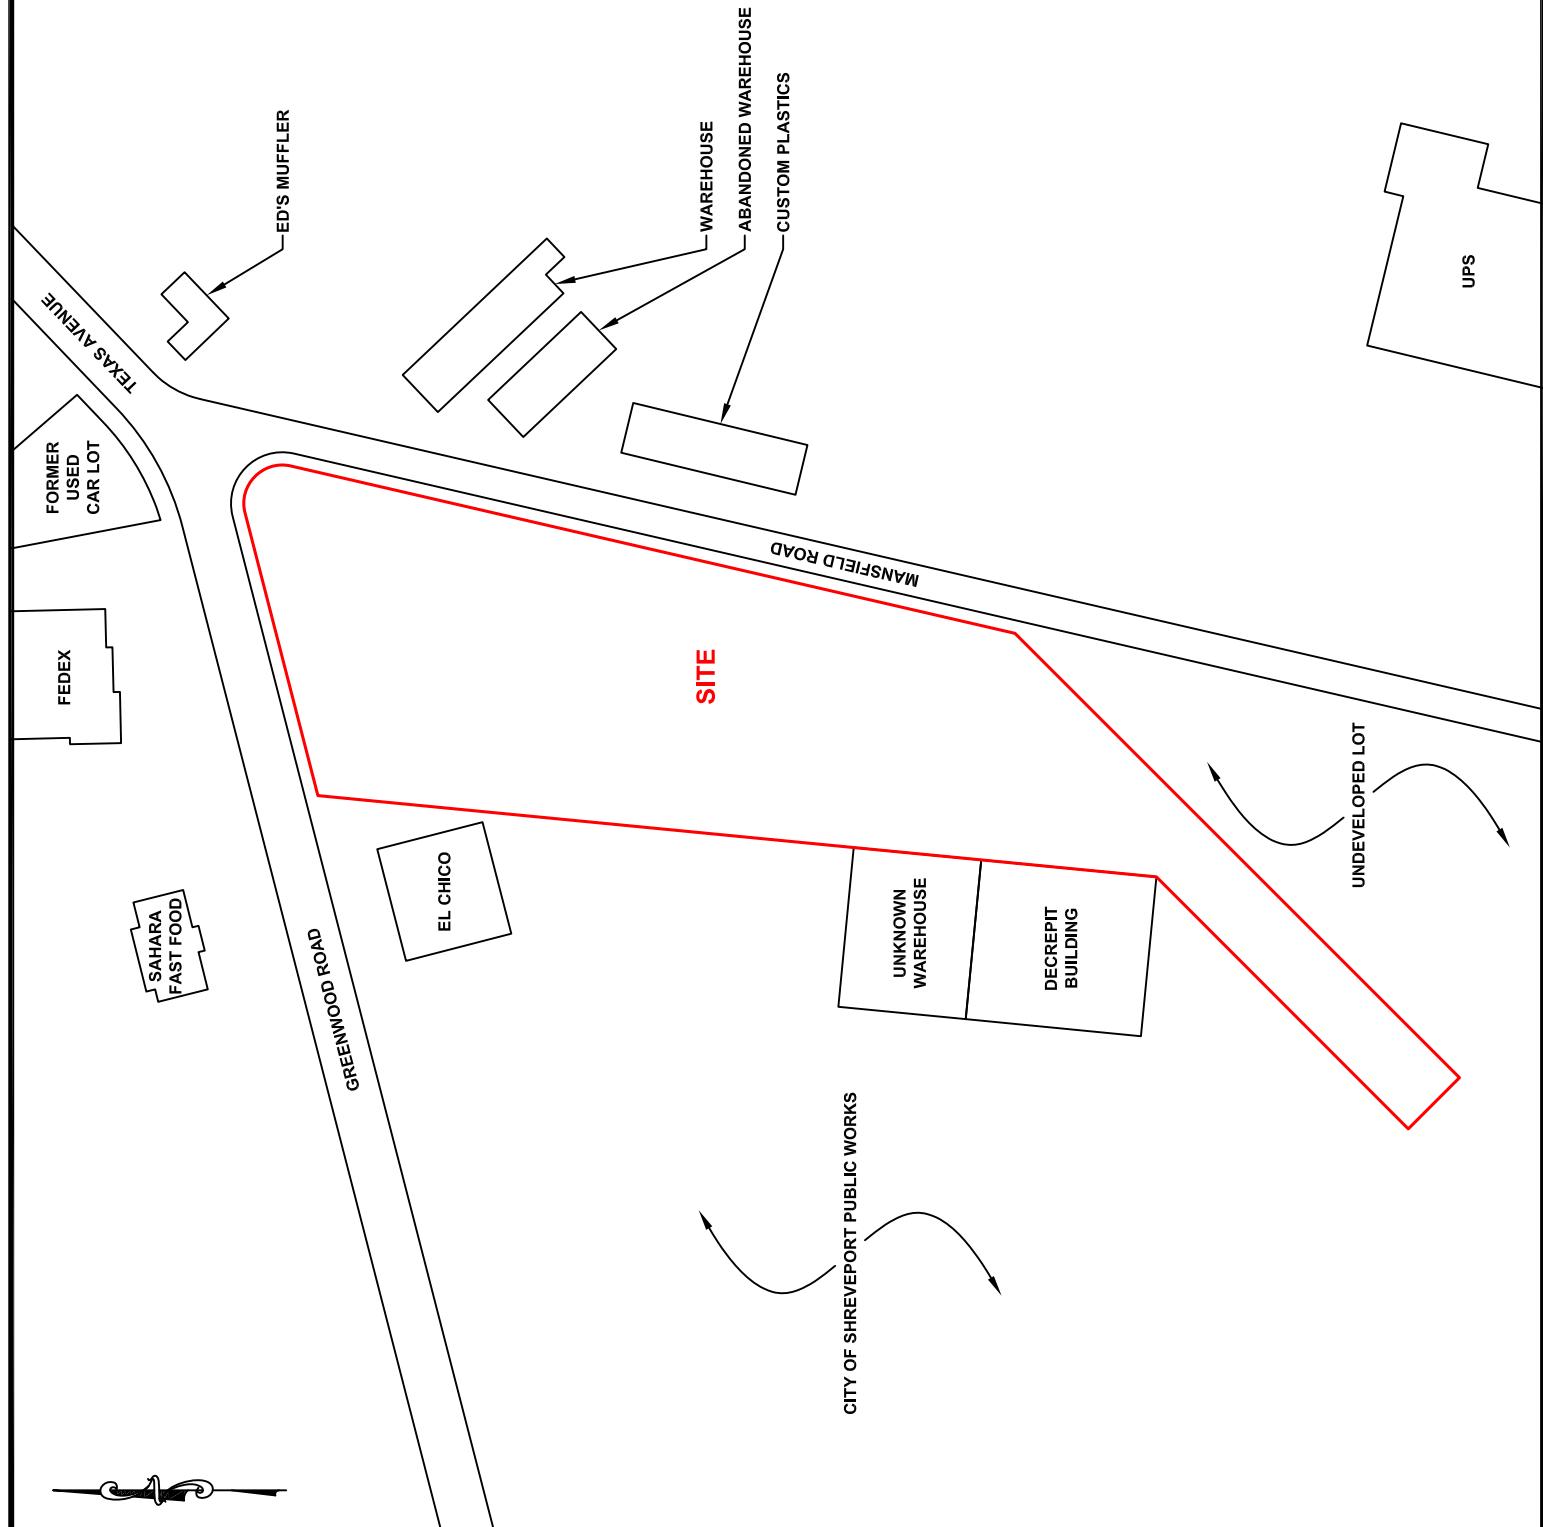

ALTEC to convey by this investigation that the Property contains no environmental hazard or contamination beyond that observed by this firm at the time of the site assessment.

This report and the contents herein are the sole property of the Biomedical Research Foundation of Northwest Louisiana. The information presented and the conclusions made in this report are for the use of this entity only.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 12/27/2011 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/15/2012 has revealed that there are 2 RCRA-NonGen sites within approximately 0.25 miles of the target property.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Owner/operator address: UNKNOWN
UNKNOWN, LA 00000
Owner/operator country: Not reported
Owner/operator telephone: (000) 000-0000
Legal status: Municipal
Owner/Operator Type: Owner
Owner/Op start date: 01/01/0001
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 01/12/1987
Facility name: SHREVEPORT CITY WATER & SEWER
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Waste code: D008
Waste name: LEAD
Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDs CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDs CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDs CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Property Highlights: Informational newsletters were distributed to numerous agencies and individuals regarding the environmental work performed. A Request for Proposals (RFP) was developed and distributed to potential vendors to develop a Quality Assurance Project Plan (QQAPP) and perform remediation services. RFPs for abatement/remediation were received and a contractor was selected. The QAPP was submitted to EPA for approval. Hazardous materials and asbestos have been removed from the site and disposed according to LDEQ regulations. Definitions of structures and surface grading is in progress to prepare the property for redevelopment.

Property Description: Former diner, paint store, paint production factory

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Location Description: Shred-it USA Willis-Knighton N parking lot - 2600 Greenwood Rd
Shreveport
Incident Source Name: Shred-It USA
Incident Desc: 0
Incident Type Desc: Release/Spill, Highway Transport
Comments: Renee Gentry, Shred-It Consultant, reported a hydraulic oil spill on 07/16/2010 at 2600 Greenwood Road, Shreveport, Caddo Parish. I spoke with Ms. Gentry in person on 07/24/2010 after not being able to reach her on the phone. Ms. Gentry stated that the Shred-It truck was in the Willis Knighton North parking lot when the hydraulic hose busted and spilled approximately 40 gallons of oil. Jones Brothers conducted the clean up. There was no offsite impact noted. ASL

Environmental Interest/Information System

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Count: 38 records.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/30/2012	Source: EPA
Date Data Arrived at EDR: 04/05/2012	Telephone: N/A
Date Made Active in Reports: 05/15/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 40	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/30/2012	Source: EPA

	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/27/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810

Number of Days to Update: 36	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/30/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/30/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 06/11/2012
Number of Days to Update: 11	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/30/2011	Source: Environmental Protection Agency

Number of Days to Update: 72	Next Scheduled EDR Contact: 10/15/2012
	Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SHWS: Potential and Confirmed Sites List

Confirmed status denotes that assessments have been performed and a determination made that (1) hazardous waste(s) or substance(s) are present at the site and (2) these sites are under the jurisdiction of the LDEQ/RSD. Potential status is an indicator that sites are either waiting to be assessed or the assessment is in progress.

Date of Government Version: 04/02/2012	Source: Department of Environmental Quality
Date Data Arrived at EDR: 04/24/2012	Telephone: 225-219-3181

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Landfill List

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 06/18/2012	Source: Department of Environmental Quality

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

A careful examination was made of the indices of the Conveyance and Mortgage records on file in the Office of Clerk and Recorder for the Parish listed above; the documents listed and/or referenced in this Chain Sheet were found to be all of the instruments affecting surface title to the above referenced property from the date of the first document listed in the chain sheet through the effective date as shown above.

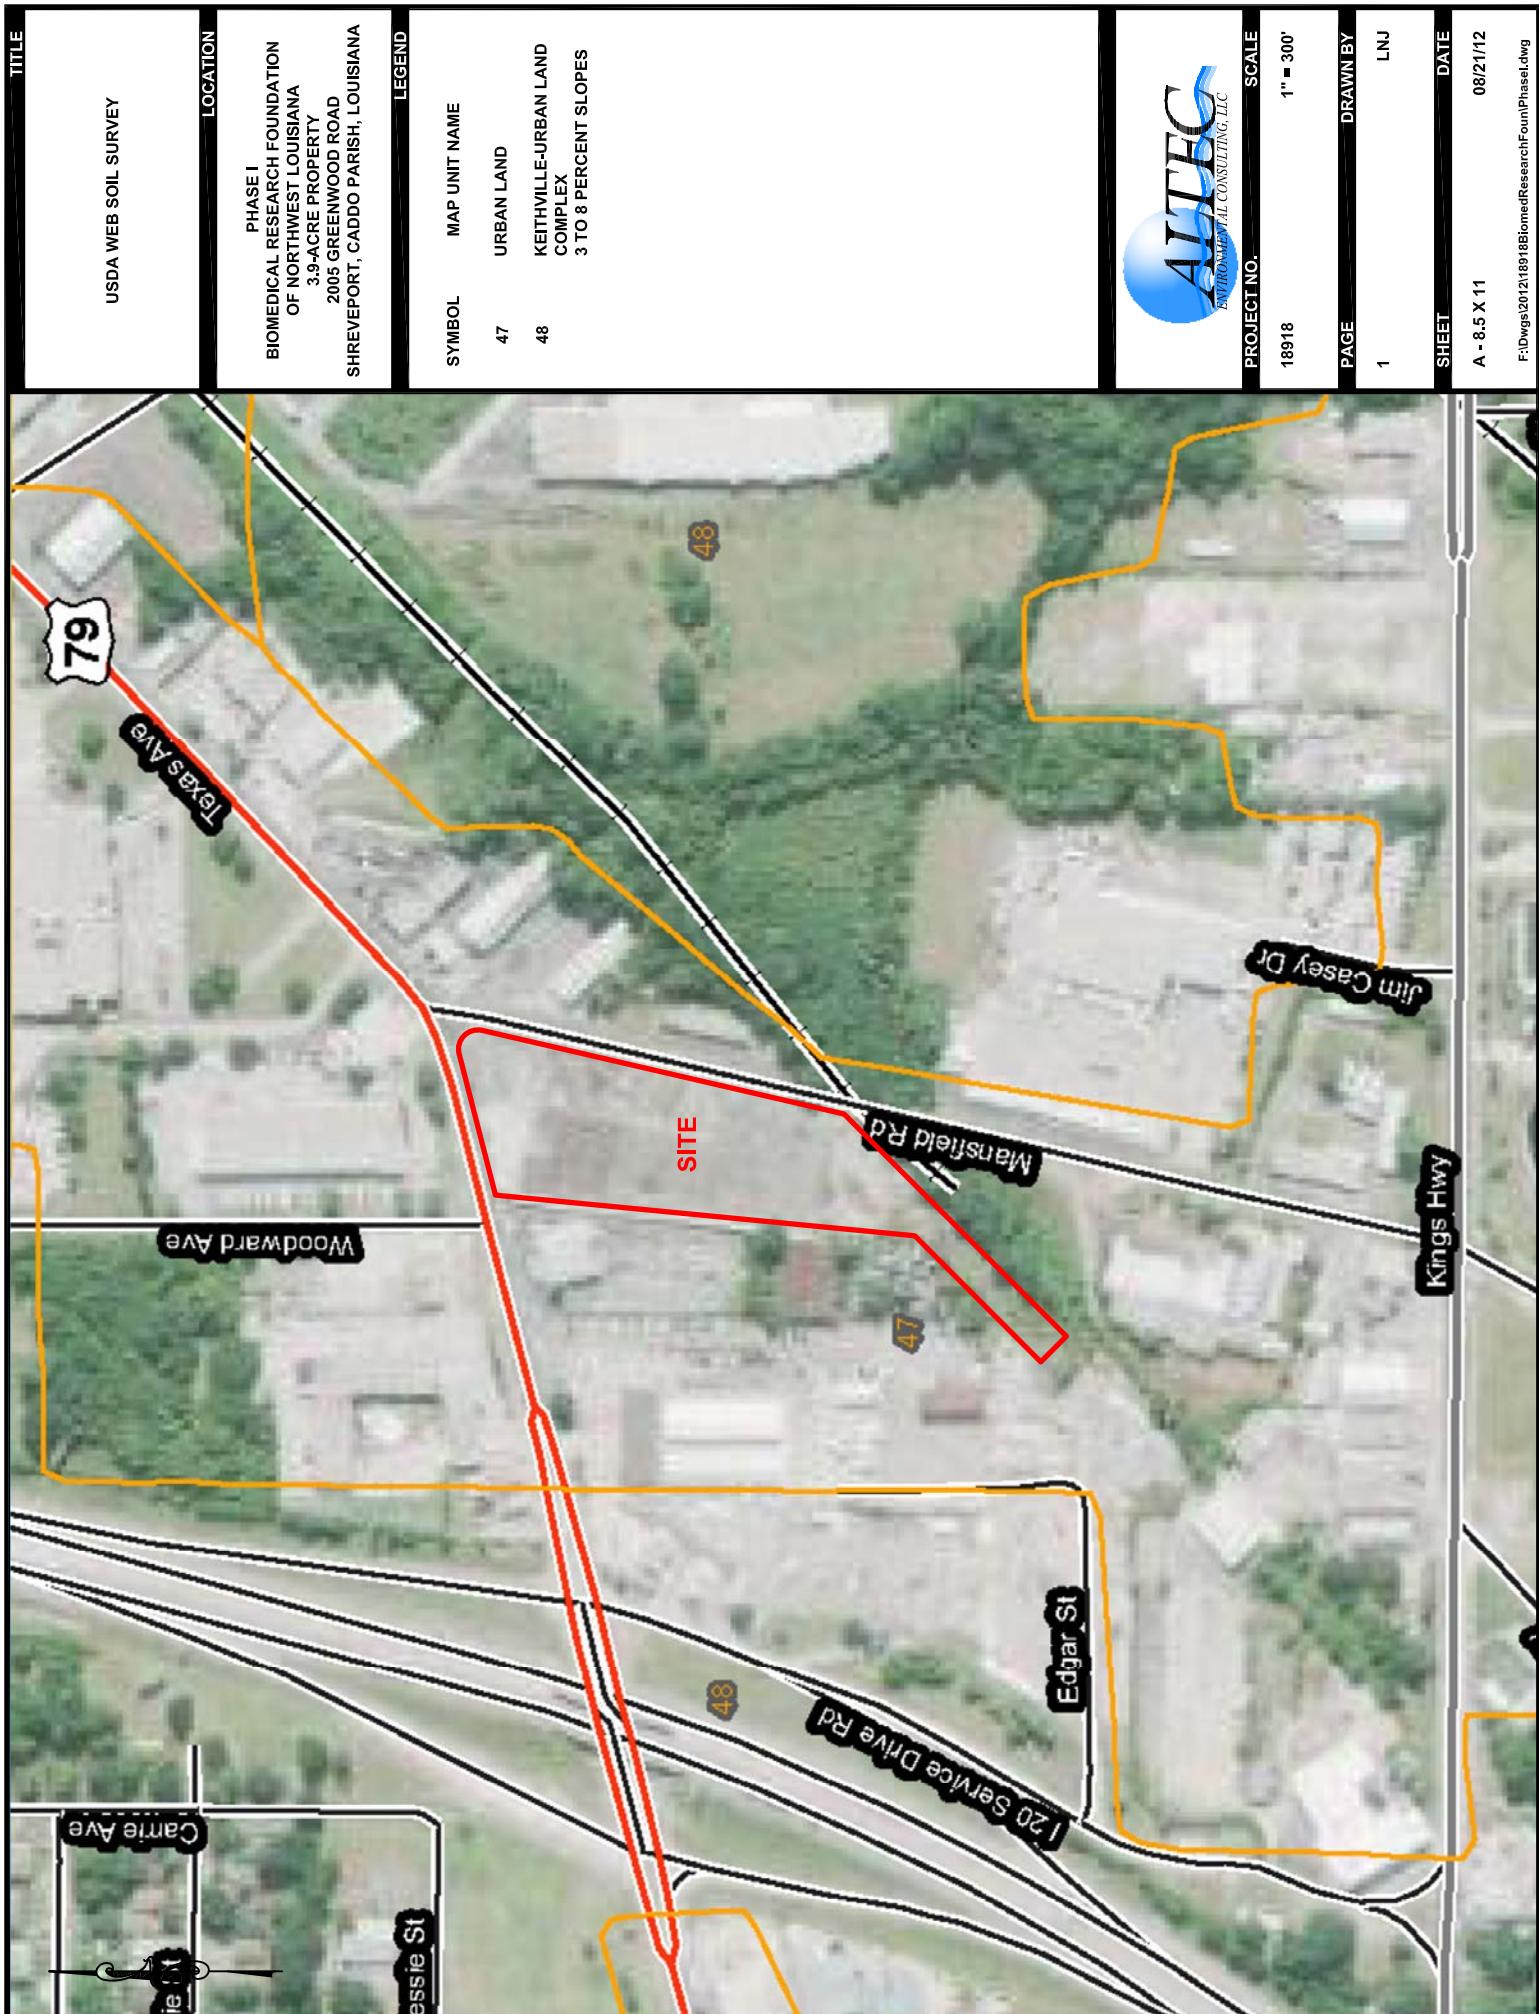

Searches have been made in the exact name or names shown. Reasonable spelling variations of the names were also searched; however, any name variations provided by the undersigned are done so as a courtesy only.

Mineral title was not examined and is specifically excluded from this search. Unless otherwise requested by you, only those oil, gas and mineral leases which are still within their primary term are included with this report. Leasehold and mineral title have not been examined and are specifically excluded from this search.
